SECOND RENEWED PETITION UNDER 37 C.F.R. § 1.47(b)

MS PCT Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Dear Sir:

In connection with the Applicant's response to the Decision on Petition ("Decision") mailed May 3, 2007, please consider the following second renewed petition under 37 C.F.R. § 1.47(b).

In the Notice, the Examiner indicates that only item (5) (*i.e.*, proof of proprietary interest) remains to be satisfied, and that all other requirements have been met. In an attempt to satisfy item (5), Applicant hereby submits a Declaration by Christophe Oddou, Head of System Architecture Department at Canal+ Technologies, asserting that Jean-Luc Dauvois worked for Canal+ Technologies as the head of the Cryptographic Department until June 15, 2002. Mr. Oddou's declaration also authenticates two organizational charts of internal hierarchy of Canal+ Technologies managers and supervisors. Mr. Oddou's declaration and the organizational charts show that Jean-Luc Dauvois held a supervisory position at during his employment with Canal+ Technologies, and was in a position to be directly involved with patentable, inventive concepts.

Docket No.: 17250/018001

Further, Applicant submits a "Transaction Protocol" (original in French, with an English Translation) that establishes that Jean-Luc Dauvois was the inventor for eleven (11) applications while he was employed with Canal+ Technologies. The eleven applications are listed on page 2 of the English Translation of the Transaction Protocol. While the applications are listed with internal Canal+ Technologies reference numbers, the Transaction Protocol shows that each of the eleven applications had to be prepared and filed by in-house attorneys. Thus, as the Examiner points out in the Decision mailed May 3, 2007, the delay in filing the French application from which PCT/FR03/50181 claims priority was due to in-house attorneys at Canal+ Technologies preparing and filing the patent applications for which Jean-Luc Dauvois was an inventor. This explains the gap in time between when Mr. Dauvois was employed by Canal+ Technologies (September 6, 2002) and when the French application (FR 0301243) was filed (December 17, 2002). As further evidence of proprietary interest, in the Transaction Protocol, which is executed by Jean-Luc Dauvois, the inventor acknowledges that the eleven patent applications are the full and entire property of the Company (Canal+ Technologies) (see translation of Transaction Protocol, bottom of page 2). Further, an e-mail dated July 26, 2007, from Natalie Zaugg, who represents Canal+ Technologies and Nagra Thomson Licensing, indicates that internal reference number I2002-013, listed in the Transaction Protocol, corresponds to the present application, Application Serial No. 10/538,725.

Finally, Applicant has provided an English translation of copies of the letters and memorandums from Canal+ Technologies (exhibits 4-6 and 8-9), as requested by the Examiner in the Decision mailed May 3, 2007.

The further evidence provided by this petition, along with the previously filed evidence, establishes that Canal+ Technologies has sufficient proprietary interest in the referenced application. The Declaration made by Gerard Delile establishes that Jean-Luc Dauvois made the

212808

Application No.: 10/538,725 Docket No.: 17250/018001

referenced invention while employed by Canal+ Technologies and that Canal+ Technologies rightfully owns the present invention under French law. As previously submitted, Canal+ Technologies underwent a name change from Canal+ Technologies to Nagra Thomson Licensing on June 21, 2004. Thus, Nagra Thomson Licensing has sufficient proprietary interest in the referenced application. Thus, Applicant believes that item (5) is now satisfied.

Applicant believes that this renewed petition, combined with the previously submitted evidence included in the original 37 C.F.R. § 1.47(b) petition filed on July 7, 2006, satisfy all the elements required under 37 C.F.R. § 1.47(b). In light of the petitioner's diligent attempts to obtain the signature of the inventors and, pursuant to 37 C.F.R. § 1.47(b), the petitioner requests that the referenced application be examined without the signed Declaration of Jean-Luc Dauvois. Such action is necessary to preserve the rights of the Applicant and to prevent irreparable damage which may be caused by the loss of foreign rights for the Applicant.

The verified last known address of Jean-Luc Dauvois is:

80 rue des Victimes du Nazisme, 72000 Le Mans, France.
